

We received the breaching tools and shield. The shield has already been used for several calls and have helped us immensely with de-escalating situations. It has provided us much needed protection while we negotiate and allows us breathing room while in vulnerable positions. Not only with that but on our approaches to homes we are given far more tactical options because of it. The breaching tools have also been amazing with our warrant service, allowing us to open multiple doors at once and giving us better vision of the home before making entry. These tools have made our job easier and safer.

I cannot begin to thank you all enough for donating them.
