United States Deputy Sheriff's Association,

In late April the Manassa Police Department was notified that we were going to receive the five-thousand-dollar cash grant. The town which like many other small municipalities around the country has budget constraints, and we are not able to provide its officers with the tools need. I am so thankful to the United States Sheriff's Association, for the grant which was used to provide our officers with two Axon body cameras kits, and less lethal tools by purchasing the Bola Wrap and the Taser 2 and extra cartridges. The Taser 2 has been successfully been deployed after receiving it and helped subdue an individual without injuries to the individual or the officers on scene. With these tools and ongoing proper training, the Town of Manassa can better serve our community by keeping them safe. We are grateful to organizations like yourself that help small agencies like the Manassa Police Department. By utilizing the tools and training we can get our officers home every night to their loved ones. With deepest appreciation, we thank you.
