

Dear Mike,

Attached is a picture of the equipment we purchased with the generous cash grant that we received from your Organization. We were able to purchase three more in-car laptops, in-car printers, power inverter boxes, in-car laptop mounts, in-car printer mounts and we were even able to buy a pair of in-car Streamlights to replace old and worn-out lights. This has been a very huge help in allowing my officers to do their job more efficiently and professionally. It has even cut down on the amount of time spent away from our jurisdiction when they take a prisoner to jail and have to have paperwork readily available. Before this equipment they were taking a prisoner to the jail, fill out a booking card with a hold, go back to our jurisdiction to our PD type up reports and all necessary paperwork then go back to the jail and finish the process. As you can imagine this easily turned in to a 2–3-hour process that kept my officers off the road and out of town to answer calls. Now it is generally an hour process from the time they depart to transport to coming back into Town after they leave the jail. It has definitely made a huge impact and we are truly grateful!!!

Thank you so much!!
