

The training I attended was in Palo Pinto County, Texas at the High School in Mineral Wells on Friday, July 17, 2020. The course was well organized with good instruction with a great deal of hands on exercises that were realistic and practical. Given the amount of information provided in such a brief course (eight hours), it was impressive how the class schedule did not make you feel rushed or educated in an assembly line process. The course did feel personal and each instructor was willing to discuss tactics and techniques with understandable explanations. This was the second time I have attended this training and I was able to obtain new information both times. I look forward to the next opportunity to train with USDSA.
