

Below are some pictures of the 19 suppressors we were able to buy with your help and the \$5,000 grant money. We are now able to issue all our rifles with suppressors, in order to keep our cops up to date with the newest equipment the gun industry has to offer. Our rifles have an 11.5 inch barrel so when a shot is fired the noise can be deafening when not wearing ear protection. With these suppressors patrol cops will now have one less thing to worry about if they ever need to be fired. There are numerous benefits associated with using suppressors including noise pollution, reduced recoil, reduced muzzle blast, reduced hearing damage, and increased accuracy. Once again, I want to thank you and everyone over at United States Deputy's Sheriffs Association for the grant money. God bless and stay safe. Anything you need from me please just let me know.

Detective Michael Cetta Jr.
Port Washington Police District
