

Mike,

The Water Valley Police Department would like to extend our many thanks to you and the United States Deputy Sheriff Association for the belt trauma kits and portable intoxilyzer. Thanks to the association's generosity, each officer was able to receive a trauma kit and has an intoxilyzer to use while they are on shift. These tools will allow the officers to be more productive in combatting drunk driving and be safer while doing it. Again, I want to extend my personal gratitude as well as the department's thanks for the help and generosity that has been extended to us. Attached is a group photo taken during an in-service training where the trauma kits and intoxilyzer were put into service by the department.

Sincerely
Chief Jason Mangrum
