

Dear Governor \_\_\_\_\_,

I am deeply concerned that budget cuts are forcing police officers to deal with criminals, anti-cop riots and even active shooters without the proper equipment and training they need to protect us, our families and our communities.

With the radical anti-police movement sweeping the country, this is no time for our officers to lack lifesaving equipment like bullet proof vests, protective anti-riot gear, emergency first aid trauma kits and other equipment needed to do their jobs.

Considering these troubled times, it is more important than ever for law enforcement officers to get cutting edge training they need to protect us, our communities – and themselves.

When our police are vulnerable for lack of lifesaving equipment and proper training, then those of us they protect are also at risk.

I strongly urge you to use your position as Governor to make funding our law enforcement agencies a top priority when deciding our budget.

Respectfully,

X
