

05/19/2023

On Tuesday, June 13th, 2023, the Osage Nation Police Department was gifted a portable breath test from the United States Deputy Sheriff's Association. The roadside breath test (PBT) is a preliminary alcohol screening (PAS) device. The device's benefit for police is that these are small, handheld devices that can quickly estimate the driver's blood alcohol content (BAC). Officers will be better equipped to combat drunk driving with this device in the field.
